

CHAPTER V

CONCLUSION AND SUGGESTION

5.1 Conclusion

From the explanation in the previous chapters, the writer concludes that there are three steps in documentary video script writing of the historical *Masjid Agung* in Palembang Sumatra Selatan. The steps written by D.V Swain and J.R Swain (1988) are in line with Research and Development by Sukmadinata (2005). The first step is Preliminary Study can cooperate with the idea of development script by D.V Swain and J.R Swain. The ideas are an idea, Theme, Research, Outline, Synopsis, Treatment and Manuscript. The second step is Model development conducted with Review. The writer did limited testing to make product developed. There were three aspects tasted by three experts in limited testing. The aspects were about the content video of scripts, grammatical errors and miss type, and also the quality of video. Then, the writer revised the video script. After that, the writer did wider testing. The writer asked the comments and suggestions from two experts about content of script to improve the video script. The last step is Final product testing connected with finalization. This is the last stage of research and development modification steps, it is consisting of pre-testing, revision and dissemination. Pre-testing is the last revising steps from the wider testing. While dissemination is the writer tries to promote the product to society. Unfortunately, the writer will not do the pre-testing, revision and dissemination steps because of the lack of cost, time, skill and legality. Furthermore, there were advantage and disadvantage of the steps. The advantage is the steps are relevant, so the writer easy implement steps that had been done easily. The steps are implemented. First, when the writer wrote the script, more understood in development script. However, there is eight ideas in the step so the time is longer and more difficult to rise the idea of paragraph in script development.

5.2 Suggestion

The writer suggests. First, next Researchers should apply the development scripts based on expert opinion. Researcher should understand starting from the basic understanding until the steps of making it, so the process will be easier. Second, it is better to make documentary video script about Historical Monument and also other Historical Buildings in Palembang besides *Masjid Agung* so this research will be better.
